CORE SKILLS

- CVAT
- Supervisely Annotation
- LiDAR Data Processing
- Point Cloud Classification
- DTM / DSM Production
- TerraScan & TerraModeler
- MicroStation
- ArcGIS / QGIS
- Powerline Mapping
- Cadastral Mapping
- QA / QC

SOFTWARE

TerraScan • TerraModeler • TerraMatch
MicroStation • ArcGIS • QGIS
Global Mapper • AutoCAD
Agisoft Metashape • ClaudeCompare
Adobe Photoshop • Illustrator
Python • HTML • CSS • JavaScript

EDUCATION

MCA
Amity University | 2023–2025

BA
Berhampur University | 2016–2019

SANGRAM KUMAR NAHAK

SENIOR LiDAR DATA PROCESSING SPECIALIST | GIS CONSULTANT

PROFESSIONAL PROFILE

Results-driven LiDAR and Geospatial Specialist with 6+ years of experience in end-to-end LiDAR processing, point-cloud classification, macro automation, DTM/DSM production, GIS analysis and QA/QC. Experienced in airborne and drone LiDAR, powerline corridor analysis, cadastral mapping, infrastructure surveys and international projects. Strong hands-on expertise in TerraScan, MicroStation, ArcGIS, QGIS, Global Mapper and Python automation.

PROFESSIONAL EXPERIENCE

Project Manager| GeoProcess Consulting | *Aug 2026 – Present*

- Manage international client relationships, project updates, feedback, and delivery expectations.
- Coordinate between regional client managers and technical execution teams.
- Support geospatial project delivery and professional digital presence through technical content.

Geographic Information Systems Consultant | Geokno India Private Limited (A GMR Group Company) | *Nov 2025 – Aug 2026*

- Supported international client engagements and monitored team efficiency and project schedules.
- Executed Survey of India workflows including georeferencing, attribute editing, land partitioning, and map production.
- Performed LiDAR classification, breakline creation, TIN and volume surface generation, and DTM/DSM production.
- Managed powerline corridor mapping, catenary analysis, danger-zone identification, and cartographic deliverables using ArcGIS and QGIS.

Geographic Information Systems Engineer | ATOMGEO Private Limited | *Sep 2025 – Nov 2025*

- Performed detailed QA/QC of complex LiDAR datasets, including LAS/LAZ metadata validation, point-density checks, coordinate verification, classification statistics, outlier detection, noise removal, and spatial discrepancy analysis.

GIS Engineer / Senior Technician | Nakshatech Pvt Ltd | *Aug 2023 – Sep 2025*

- Led photogrammetry and drone-processing workflows, optimized GCP networks, created classification macros, and generated colorized LAZ deliverables.
- Extracted 2D street polygons and 3D building footprints for UK infrastructure projects.
- Managed powerline processing, flight-line alignment, trajectory adjustments, and QA/QC.

GIS Engineer | Khatib & Alami | *Apr 2024 – Dec 2024*

- Completed a 9-month international deployment in Qatar, supporting airborne LiDAR processing for large-scale urban mapping projects and delivering accurate DTM/DSM outputs.

LiDAR Team Leader | Spectra Engineering Services Ltd. | *Mar 2022 – Aug 2023*

- Led engineering teams, optimized workflows, established QA/QC pipelines, and delivered complex environmental and WebGIS projects.

LiDAR Engineer | GEODESY MAPPING SOLUTIONS PRIVATE LIMITED | *Sep 2021 – Mar 2022*

- Performed UK infrastructure LiDAR QA/QC, filtering, flight-line matching, noise removal, and client advisory.

LiDAR Engineer (Trainee) | Nakshatech Pvt Ltd | *Oct 2020 – Sep 2021*

- Performed trajectory correction, flight-line matching, classification, and foundational LiDAR surface-generation workflows.

SELECTED PROJECT EXPERIENCE

Powerline Corridor & Vegetation Danger Zone Analysis

TerraScan macro automation, point-cloud classification, vegetation clearance analysis, MicroStation vectorization and GIS atlas delivery.

Survey of India – GIS Cadastral & Property Mapping

Parcel topology, property splitting, UPID assignment, ownership/attribute integration and rigorous GIS QA/QC.

Advanced LiDAR Project – Qatar

3D point-cloud classification, feature extraction, Python automation and conversion of LiDAR workflows into WebGIS platforms.

TECHNICAL EXPERTISE

LiDAR: Point-cloud pre-processing, classification, trajectory correction, flight-line matching, powerline mapping. Elevation: DTM, DSM, GCP alignment, ortho-rectification. GIS: ArcGIS, QGIS, Global Mapper, cadastral topology. Automation: Python, HTML, CSS, JavaScript.
